# Ringstraße Sonnenallee

Vienna

This design for the new urban lakeside of Vienna-Aspern is based on the master plan by Tovatt Architects & Planners. The central element of the design is the four-kilometer-long ring road. This curving road doesn't just serve traffic, but also provides an attractive location for pedestrians, cyclists, and people searching for a place just to sit and relax. Hotspots are located along a linear route, each defined by its own unique characteristics. The first section comprises green areas and is for children and young families. The second section is designed to appeal to teenagers, featuring a cycle track, boccie area and arena. The third and final section is for the general public, based on the concept of a picnic blanket.

**Address:** Aspern, Vienna, Austria. **Landscape designers:** Acer Campestre. **Completion:** 2015. **Area:** 17,300 m<sup>2</sup>. **Paving:** concrete pavement. **Context:** ring road and new town center.
